Product Description

Burromax Electric Mini Bike, TT1600R

Our TT1600R is our largest bike and has lots of performance and features you will enjoy that are perfect for a utility bike like this one. With an extra padded seat this bike was intended to accommodate riders up to 6'4" comfortably and can pull up to 350 lbs on pavement. We keep the bike weight down to 99.5 lbs and pack in a ton of performance with 4 selectable ride modes. Two ride modes are soft and easy to ride and two ride modes for guys who want power right now! With stock gearing it comes in with a top speed of 32 Mph. Very cool LED Halo headlight and handy bright LED sidelights for safety and campers. This is a great bike for kids who started out on our smaller TT series bikes and want to go to a bigger more motorcycle-sized bike. We are sure you will be impressed with the quality and features. Fun for the whole family!
