Product Description

Burromax Electric Mini Bike, TT750R

Everyone who gets on the TT750 Thunderbolt says "Whoa - that's got a lot of torque!" - Its the fun kind for adults 16 and over. This will be your go to pit bike and it's already traveling the woods with hunters and putting smiles on faces at events. This bike has a lot of hit when you twist the throttle and should be all you need for this size bike. The TT750R is in a class of its own in the 750W and below electric mini bikes and it will not disappoint on performance. This is the same basic bike as our other TT series bikes with standard features like a front and rear suspension, front and rear disc brake, keyed ignition, variable throttle, and a 20" seat height. The noted exception is the performance specification. In addition it has a standard powerful LED Headlight, a new thin line LED tail light, a digital voltmeter and all bikes come with a taller set of handlebars that will accept our accessory items. Enjoy this one!

Features:

- One of our most powerful models of TT Mini Bikes
- Expect max speed of 26 mph with stock gearing
- Expect 14 mile range with 180 lb rider and 18 miles with 100lb riders on flat ground. Testing was done on road surfaces and with wide open throttle for the entire test
