Product Description

Burromax Electric Mini Bike, TT250

Every Inch of this bike says motorcycle! We have created the coolest and best quality piece out there. We've scaled down a cross between a TT Enduro and a Flat Tracker to give you a distinct look, added large diameter aluminum alloy wheels with 12.5" diameter pneumatic tires, rear disc brakes and a taller and wider 21" seat height for rider comfort with adjustable wide handlebars for added control. Heavy duty welded steel tube frame with adjustable mono shock rear suspension and telescopic front forks make this bike a very smooth ride. A realistic looking engine houses the power source and really helps set this bike apart from the competition. Our 250W motor with a 24V SLA deep cycle battery power system includes a charge indicator mounted on the motorcycle style twist grip throttle control. Select the top speed for riders skill level at 7 mph or 14 mph, has a 12 mile range with a 100 lb rider. The bike can be recharged in 8hrs and comes with a 1.5 amp UL listed charger. A keyed ignition keeps the unit secure and a simple-to-use charger makes for hours of fun for the kids!

You will see the quality difference over our competitors in the E Mini Dirt Bike market.

Features:
